Dear Mayor Kabat:

This letter is a follow up to earlier conversations that you have had with representatives with the Town of Campbell regarding possible PFAS contamination at the airport. It is my understanding that testing has been conducted on 120-130 private wells for PFAS contamination. Many Campbell town residents have received their results back. The Town Board also chose to test wells at the Town Hall, the Community Center and the Library.

The Campbell Town Board is concerned about the potential impact the contamination has had and will have on its residents. In that spirit, the Town Board requests the City of La Crosse to test all of the private wells on the Island. Campbell also requests that the City reimburse the cost of testing of the wells indicated above (Town Hall, Community Center, and Library). It is my understanding that additional funds have been set aside for the investigation of PFAS. Any additional information that you can provide us at this time regarding this ongoing investigation and/or the results known at this point would be appreciated as well. Thanks.

Very truly yours,

JOHNS, FLAHERTY & COLLINS, S.C.
