August 20, 2021

The DNR and DHS have approved extending the current water advisory for Town of Campbell residents. Residents **do not need to do anything** to keep receiving the contracted water. It is status quo.

The DNR will send individual letters to Town residents in the coming days with additional details and information.

Curtis Hedman from the Wisconsin DHS says, "DHS has completed a review of the PFAS data for French Island available to date, and we are in agreement with DNR that there is still insufficient data to make any revisions to the existing interim area-wide health advisory for PFAS. DHS recommends that this health advisory remain in effect as originally written while French Island area stakeholders pursue sustainable long-term alternative water solutions for island residents. DHS and DNR can continue to review French Island PFAS data as it accumulates and periodically assess the need for interim area-wide PFAS health advisory revisions in the future".

A public listening session with Q&A is scheduled for September 9th at 6PM via Zoom. A zoom link will be sent prior to the meeting.

The Town of Campbell appreciates this move by the DNR and DHS to continue providing safe drinking water.
